

1³/₁₀ mi. W, 1³/₁₀ mi. N Lawrence (P.O), Douglas Co., Kansas

April 5, 1976

From 45 pit traps on N side Peterson Pond caught (all morning inspections at about sunrise);

760405-1 *Cryptotis parva*

760405-2 " "

760405-3 " "

The first two together in same trap and both dead.

The 3rd one also dead in trap. All in good condition because of cool night temperatures.

April 6, 1976

No shrews in forest pit traps or any other kind of mammal

1³/₁₀ mi. W, 1³/₁₀ mi. N Lawrence (P.O), Douglas Co., Kansas

April 6, 1976

From N side Peterson Pond did not capture a shrew but an immature *Microtus ochrogaster*

760406-1 *Microtus ochrogaster* 102-23-15-17- 9gms ♀ wt. normal.

Released this mouse at the trap site.

A greater yellowlegs, one of two at pond, remained in area and ^{continuously} called for 35 seconds at 2 calls per second. The dog was the cause of this reaction. This is the first time I have heard this kind of continuous call.

1³/₁₀ mi. N and 1⁹/₁₀ mi. W Lawrence (P.O), Douglas Co., Kansas

April 7, 1976

No mammals from forest pit traps (75). Approx 8 of these traps had rat food removed.

1³/₁₀ mi. W, 1⁴/₁₀ mi. N Lawrence (P.O), Douglas Co., Kansas

April 7, 1976

Captured the same *Microtus ochrogaster* (760406-1) in some pit trap. Sacrificed and sexed. No shrews but 80% traps without food. All shrew captured so far are from traps set in trails and in grassy areas of relatively thick stands. Signadenlike trails less productive.
