An itemized record of above shows a particular segment of the whole bay area which composed of the same complex of birds. I would judge the total figure would represent 1/5 the entire bay population. The last time we were here there were at least 20 times the number of birds recorded in the census today which follows: (census by sweeping of scope and ~~ducks~~ waterfowl swimming past a fixed point of the scope)

redbreasted merganser 1 = (1)
curlew 1, 1, = (2)
dowitchers 8, 12, = (20)
coot 4, 13, 8, 4, 1, 1, 1, 12, 1, 1, 4, 1, 1, 1, = (35)
pintails 3, 1, 1, 1, 1, 2, 1, 1, 1, 1, = (13)
redheads 5, 4, 7, 1, 1, 1, 1
