

or individuals responsible for the pollution by requiring them to remove the tires from the bank of the river. The polluters should also clean up the river bed by removing the tires already dislodged from the river bank. This could create a national attention to a serious problem.

From the stool area near the head of the sandbar collected the following artefacts and bones. These bones could be as old as late Pleistocene and as modern as the cow:

- 770404-2 max. teeth, *Odontocetes virginianus*
- 770404-3 max teeth in upper jaw
- 770404-4 pot - sherd
- 770404-5 rib
- 770404-6 axis vertebra
- 770404-7 carpal bone
- 770404-8 tibia
- 770404-9 2nd phalanx
- 770404-10 tibia
- 770404-11 tibia
- 770404-12 axis
- 770404-13 base antler
- 770404-14 femur
- 770404-15 first phalanx
- 770404-16 femur.
- 770404-17 thoracic vertebra
- 770404-18 femur
- 770404-19 tibia fibula
- 770404-20 thoracic vertebra
- 770404-21 atlas
- 770404-22 cervical vertebra
- 770404-23 lumbar vertebra
- 770404-24 astragalus
- 770404-25 femur
- 770404-26 astragalus
- 770404-27 first phalanx
- 770404-28 basesphenoid - basioccipital
- 770404-29 3rd phalanx
- 770404-30 femur.
- 770404-31 atlas
- 770404-32 tarsal bone
- 770404-33 thoracic vertebra
- 770404-34 tibia
