

Chaney River, Chautauqua Co., Kansas

April 9, 1977

Mary Pauline took group of Explorer scouts on canoe trip on Chaney River on a two day trip. Trip outlined and camp indicated.

Mary collected the following unionids below Hewins:

- 770409-1 Proptera alata
- 770409-2 Proptera purpurata
- 770409-3 Actinonais carinata carinata
- 770409-4 Lampsilis ovata ventricosa

Other unionids found were Pretigenia verrucosa, Anodonta grandis, Crenodonta parvioria and Lampsilis anadontoides anadontoides and Lampsilis radiata siliquoides

Because of the low level of water there were many short portages.
