

miles per gallon of gas on trip. Pulling trailer against wind uses most gas per mile. Electronic distributor increases mileage by at least 3 gals per mile. Premium gas logs better mileage than regular.

Terrain and speed are also factors as well as in city versus highway travel. Average miles per gallon = 10. On this basis we would have used approx. 334.7 gals and at 65¢ per gal would = \$ 217.00 for gas.
