

11:45 either redtail or g.h. owl nest. Bluejay, 2 bluejays. 11:55
 large hole in dead trunk 8' high may be used by screech owl. a
 2" x 12" x 4' plus bear tree. 11:58 ridge now trends SW, redheaded wood-
 pecker. 12:00 n entrance Boulder Bay. 12:04 crossing at head of
 bay. 12:07 S entrance B. Bay. old road drops down into lake here.
 Boulder Bay is named for large boulders at head of bay and in
 general area. water entering bay 1 gal per 5 sec, clear, rocks in
 bottom creek covered with algae. 12:10 road reappears from
 lake, 2 red-headed woodpeckers. Fence of wire N-S. shrub with 1"
 red buds. 2 red-headed woodpeckers. tree 1 1/2" diameter felled
 across road. 12:20 drainage at head of Quail Bay. This bay is
 named from an old truck body (The Quail Dairy - GRADE) a short
 distance up drainage on S side. 3 sets deer tracks. Beyond is a
 new forests with green grass beneath. 12:25 drainage. 12:26 drainage
 The drainages are from fields that have previously been cleared
 of timber but now regrown to forest. Considerable droppings of
 deer, moreso than elsewhere on trip. 12:27 3 wood ducks and
 a large cottontail. 12:30 drainage 12:35 2 junipers The
 largest 400 mm. in circumference and 30' from present level
 of lake. 2 downy woodpeckers. 12:37 redtail left nest and
 did not call. The tree measures 49" cir. 2 redheaded woodpeckers
 near. 12:41 redtail? nest on upper bench, tree 1' dia. This
 is the best time of the year to make census of redtail nests as
 they are easily observed without the foliage but at the same time
 the redtails are nesting. 12:52 2 redheads. 12:46 old rock
 fence ran E-W, individual rocks covered with green growth.
 This fence ends abruptly. The fence line continues E up to ridge
 that slopes to S ^{with} trees standing in ^{water of bay}. This area used by bald
 eagles this spring. 12:50 head of Tree Bay from the large
 12:53 wire fence line N-S. 2 red-headed
 woodpeckers. water of bay 100' above fence. 1 gal per 3 sec.,
 water clear 1:03 head of Neighbor Bay, named because
 nest to Homestead Bay beyond. It has been snowing (few
 flakes) the last 20 minutes. 1:08 head of Homestead Bay, from
 old homestead near by. a juniper at falls above bay 32" cir.
 water 1 quart per. 4 secs. 2 red-headed woodpeckers, 3 crows.
 1:13 at old homestead by Homestead Bay (S). Old buildings gone
 but collapsed well, old bedstead & fence remain. of special
 interest are the daffodils that are in full height and blossom
 they are extending their growth but still as a single mass
 rather than difused mainly because of their growth by tuells.
