

Deer Creek ridge may have been made by drainage from Timpanogas before N Fork pirated the east flowing drainage. Photo 810402-6 of Arsen Grove terraces & Elk Mt to left. Deer Creek ridge is excellent place for photographing this mt. Photo 810402-7 of Stewart #2 Cirque. I believe that property should be picked up on Deer Creek ridge at vantage points. Photo 810402-8 of Timp. taken a few miles farther down the Provo Canyon (see 755.1) showing Stewart Cirque area. 750.7 golden eagle with some modelling underneath. On ridges E of Deer Creek Reservoir. 751.9 magpie. 755.1 a photo of mt. Timpanogas; (see above) 755.6 Sand dam of Deer Creek Res. 757.1 Photo 810402-9 of Cascade Range shooting down Provo Canyon. 765.8 Photo 810402-10 of W side of Cascade Range from ^{near} mouth of Provo Canyon. Arrived Provo City at 771.0 at 1:00 P.M. Marys at 30774.1 at 1:20 P.M. having travelled 1451.7 miles today. First night at Mary B Jensen's home at 15937, 1450 E, Provo, 84601.

Provo, Utah Co., Utah

April 3, 1981

This A.M. drove toward Springville and in pasture at edge of mud Lake rushes recorded the 5 large mounds that have always been there as long as I can remember and could have been made and inhabited by Indians (Pueblo). They are W of Interstate highway. The frontage road leaves Springville exit and goes N until it stops just beyond where the frontage road goes under the high power lines and also beyond Hubble Cr culvert.

In period when these mounds may have been used the mud Lake shoreline probably was just W of mounds. Today the waters of mud Lake are to mounds but there is a mile or so of bull rush between the mounds and the open water beyond. Mud survey of mounds last did not see evidence of the mounds having been inhabited. The remind me of mounds in SW part of Provo.
