

Left camp and back to 112, Can say that this is one of the most delightful camps we have had. It is above the Straits and offers a full view. Continued W on 112, thence S at Puget River to 101, thence to Destruction Island where I made photo 810513-3 of a creek entering the Pacific Ocean just S of Destruction Rock. Continued S to Kalalock Camp Grounds. <sup>meilage 33702.5</sup> Recorded several shots at camp and in general area.

810513-4 Annette at trailer which is a brink of high shorebank with beach about 20 feet below.

810513-5 Afternoon view ocean from beach at first cliff to N.

810513-6 Twisted root system & logs on beach. The government should receive all shore wood removed from the beaches of the world before permit granted for live tree harvest.

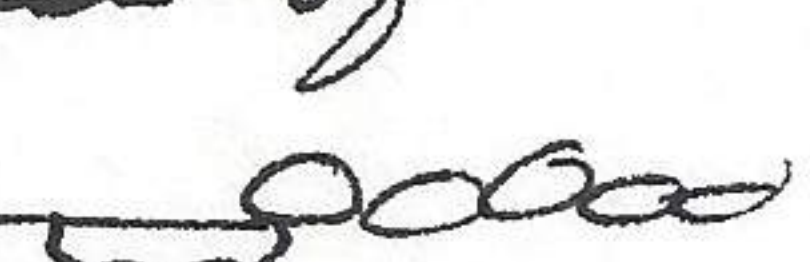

Kalalock Camp, Olympic National Park, Washington.

May 14, 1981

min temp 50°F

This camp on the Pacific Ocean is outstanding.

Birds in area wandering tattler, raven, crow, glaucous wing gull, barn swallow, surf scoter, rhinoceros puffin, dead skate (3' long). Rained all last night and cloudy this A.M.

Photo 810514-1 of a group of glaucous winged gulls resting along side of water channel from land. There is a 3 foot band of gull tracks all along the outermost logs in  tracks. Tracks elsewhere but here concentrated.

The gulls seldom feed at the edge of the water in the wet saturated sands.

As the tide pulls away from the beach it leaves parallel rows of debris, yesterday there were 7 major rows and 5 minor rows mixed in. Today there are 4 major + 2 minor rows. There is also a luminescent purple material that come from landward and spread out onto the upper part of beach.

Left camp for Camby State Park. Meilage at Kalalock River just S of Kalalock River meilage 33704.0 at 9:00 A.M.  
708.8 Queets River. 709.6 Co. line. 713.1 Jefferson Co.  
The road crosses Jefferson Co 3 times. No birds so far  
721.4 Raft River <sup>(N.G.)</sup> 736.0 Out one of the Quinault Company sites, made photo of large cedar and Douglas fir trees.
