

moved into 2 feet of feeder after other tame ducks paved the way of confidence. Finally the snow geese would feed from the hand of the feeder. Coot would not approach nearer than 10'-12'. They are more active in chasing the bread than were the geese & other ducks. The snow geese dominated the domestic ducks. The gulls are ring-billed gulls and approx 50 in camp area. The greatest number of gulls, 300, fed on W and N shore lines flying out from shore about 1/10 mi. One horned grebe swam in middle of lake, 2 ♂ & 2 ♀ ruddy ducks swam by about 1/10 mi. out into lake. A single blue-wing teal fed with 18 coot. 1 pr native mallards (they are smaller than domestic mallards). Purple martin and barn swallow fed in bay area. 1 song sparrow along edge of lake. Robins in open areas. Killdeer. 15 Canada geese had bills pointed yellow, 3 without point. One called from channel area and rest responded and all then moved N E along edge of lake with leader in front. This evening and snow goose flew away and the other called continuously. An employee of the park said there were deer, bobcats, grey foxes and a few red foxes in area as well as beaver & muskrats, and increasing.

Birds in area:

slate-colored junco	8	ring-billed gull	350
great blue heron	1	song sparrow	1
