

one or two inches of being covered. At marina parts of parking area under water. Talked to one individual who says that I 80 is expected to be closed sometime next year because of rising waters. Saltair will suffer heavy damage. already a dike of a few feet high has been placed around the structure which only 2 foot or two from flooding. wet cycle predicted for 2 years at least. Dilution of salt in lake has already caused some decay problems. One can still float in water.

We visited Saltair which is the newest Saltair. The first one of 1893-1925 was on pilings north of here where 80 turns SW. 1929-1970 in new position as well as no III Saltair in same position as 1929-1970. Fires have leveled Saltair several times.

In present state (see photo 831110-2 of stat of Barth and Saltair in distance) it consists of a large hall with stage and surrounding dining area. Some enclosures of food & drink fountain in N & E side. Outside a ^{water} ~~plaster~~ in final stages of construction and a temporary pool for ^{pump} ~~drinking~~.

Birds in area (of Barth) 6 leaved grebe, 2 ring-billed gulls, 2 mallards. Elsewhere (to marina) 18 leaved grebes, 6 horned grebes, 8 ring-billed gulls, 2 Calif. gulls, 6 avocet, 18 red-winged blackbirds, 3 coot, all in salt water. (In recollection Sid says to read Blue Highway by Williams ^{Heat moon} East and Atlantic ^{High} ^{by Buckley} also two in a high sea in a 20' sail boat.

^{Davis Co}
 1/10 mi. S Saltair, Great Salt Lake, Utah
 Nov. 11, 1983.

approx. 450 Herring gulls, some circling high. Saltair 2 feet above water, foundation below water. Waves on 2 1/2' dike 1 1/2 way up dike. 38 leaved grebes 1-2- to 8 birds in flock.

Left. Past Black Rock, the slopes (NW) on Ogden mt have great amount of deposits of Calcium carbonate. Some shorelines have cut into solid rock. 114.7 now S from I-80. 115.6 lower 117.0 limestone outcrops in valley indicating valleys may not be of block faulting. 12 horned larks flew S along road at 35 MPH 125.6 Tooele more wave action on N side of Bonneville peninsula that spans the valley than on S side of peninsula. 139.6 now 73 E.
