

water approx 5 feet higher than road.
see rather than blowing up over dunes.
036.7 half road washed away & repaired.
037.4 sp. hawk, sp. hawk. 038.2 sp.
hawk. 039.8 7 boat-tailed grackles.
040.4 Common egret. 041.1 noted a fire just beginning
on damaged home.

Debris settled on lee
gulf
areal
↑ debris ↑ break thru dunes
(this is where road
damage occurs.)

8:23 A.M.
The fire had just been
started not 3-4 minutes
before. In 5 minutes

the flame was up ridge to top of structure. No one was in area
when we stopped, fire in conspicuous place, flame clear (no smoke).
If set by arson, fire would have been on other side of building
away from clear view, fire would have black smoke from oil or
gas, someone would have been seen in area.

041.8 sp. hawk. SE 968 Texas. First car parked "E of
fire at big bank on meadows lee of dunes; shrike. Beaches
are noticeable remodelled and are gently curved but other-
wise smooth to the edge of sand dunes. No debris or
irregularities
of sand on

beach. 041.6 road now along beach some damage. Cement Condominiums
held up but wind has blown thru from one front glass window
to rear windows, all disrupted, some completely blown out,
some with less than sever damage. 044.6 sp. hawk. 044.7
2 photo.

840104-1 dislodge boxes of stacked Condominium,
840104-2 " " " " "

5 common egrets, meadowlark. 046.1 Kingfisher.
Palm trees survived hurricane but freeze killed them. Some trees
have been pushed over at a slant but none completely so.
046.9 top bridge, cormorant, many shorebirds NE including
300 gulls, g.b. heron. 047.7 sp. hawk, meadowlark
056.3 Site A20 at Thousand Trails (Galveston Island).

This afternoon photos of fish (collected 840103-1):
840104-3 alligator gar, dorsal head. 830104-10 ganoid scales of longnose
840104-4 ganoid scales (dorsal) gar.
830104-5 dorsal head plates
830104-6 tail
830104-7 tail and caudal fins
830104-8 ventral skull
830104-9 anterior rostrum, double row teeth.
