

Colville, 4 magpies thru this area, 619.3 golden eagle. 619.4 overpass on highway 40 622.7 striped skunk road kill worked by 2 magpies. 629.4 marmot road kill beyond Keetley. 630.4 near midway striped skunk road kill. 641.4 Homestead at 2:25 thinking that Mary & I might be there. Deer Creek Lake up to base of Charleston road. Snow Lake the island now had a broad connection of water. Unusual amount of water over Bridalveil falls. Provo River has more water than usual. 670.1 Provo at 3:30 P.M. 675.1 Mary & I home. Spent night at Cabin at Sundance.

Sundance, Mt. Timpanogas, Utah Co., Utah.
Aug. 13, 1984

Returned to Provo. Received word that Pally was to be in Seattle so we left for Seattle at 43675.3 at 10:30 A.M. Small patch of snow on eyebrows of Timpanogas. Some pockets of snow on Cascade 2,000 from top as there were also in gullies on Mt. Timp from old snowslides. Green above timberline on Cascades. Turned back from Pleasant Grove. Left second time from Mary at 12:25. 746.2 first gull since Provo 793.8 mule deer road kill on Interstate 15, just S of Willard. 784.6 is apt 354 to Willard. 796.5 30 aracet and 5 black-necked stilt in saline pond by road. 3 snowy egret flew overhead. 10 pelicans. at 5:30 P.M. 854.4 Arrived Snowville.

Snowville, Utah.

Aug. 14, 1984

Camped in parking lot of LDS Church. Left 854.4 at 8:00 A.M. A robin, barn swallow hawking over fields and 2 mourning doves, ^{and night hawk} only birds in Snowville. 43861.7 Idaho at 8:20 A.M. Idaho is the beginning of the flat-topped junipers, red-tailed hawk, meadowlark, 2 mourning doves associated with juniper trees. Few dead junipers. Junipers grow on an elevated bench of sand dune? strip which also permitted these junipers to grow down into the more recent exposed valley. A warning sign of severe winds storms just beyond junipers would also suggest sand dune formation at one time. Vegetation (grasses) grow to base of trunk of juniper. 869.7 raven. Valley is sagebrush. Divides are more extensively
