Provo, Utah Co., Utah
          Nov. 28, 1985

Spent Thanksgiving with Mary & Son. Mary served a wonderful thanksgiving dinner.  At her home (1593 N 1450 E, Provo 840601) which is on the top (edge) of Bonneville level, noted the following:  1 prairie falcon, 1 goshawk (this bird rested on top of a small scrub oak for 15 minutes, then flew to edge of roof for 3 minutes before leaving), 2 ♂ ring-necked pheasant,  5 flocks (average 20) robins flew by, 2 flocks (average 250) starling flew by, 18 pine siskin, 6 mule deer, rested in open patches of scrub oak. Observed deer to feed on live Artemisia.  These deer have being using this area for several weeks as a refugea.  Occasionally one will cross lawn or walk down cemented area under the porch overhang. They leave fecal pellets on the lawn.   2 magpies and one Stellers jay frequented the area as did 8 slate-colored juncos.   James Robert Bee arrived Thanksgiving day ∨ left next day.
                                                        visited Ramses II
          Nov. 29, 1985

Mary and I visited The Monte L. Bean Life Science Museum and resolved several problems concerning gifts of archeological and natural history collection:   They include:

official deed of gift                     list of books
donor form (legal doc.)                   title form (research associate)
loan form                                       both Museum & Archeology
Endowment                                 Dr. Darold M. Allred, director
request for allotment funds.              of Bean Museum handled all
loan of 7 paintings                       business transaction.
