

At 4:50 PM when last sun on clouds left the wind was driving waves (SE) at a rate of 50 waves in ^(interval 2.6 sec) 2 min, 10 sec.
 At 5:00 P.M. wind had increased to 50 waves in ^(interval 2.4 sec) 1 min, 39 sec, at a time when the 6 ton Barth rocked and ventilators increased noise from air friction. In the initial increase of wind the waves become closer together.
