

from 3' to 15' from shore in front Bee House. Red-necked grebe and pigeon guillemot in area.

12:20 P.M. ⁶³⁹ Arctic loon in raft 50' wide and from Flower Island to high cliffs of Bald Bluff on Blakely at 2/3 distance from Bee House to Leo Reef.

Also associated with the above loon were: 35 double-crested.

cormorant, 14 common murre,

6 pigeon guillemot, 5 mew gulls,

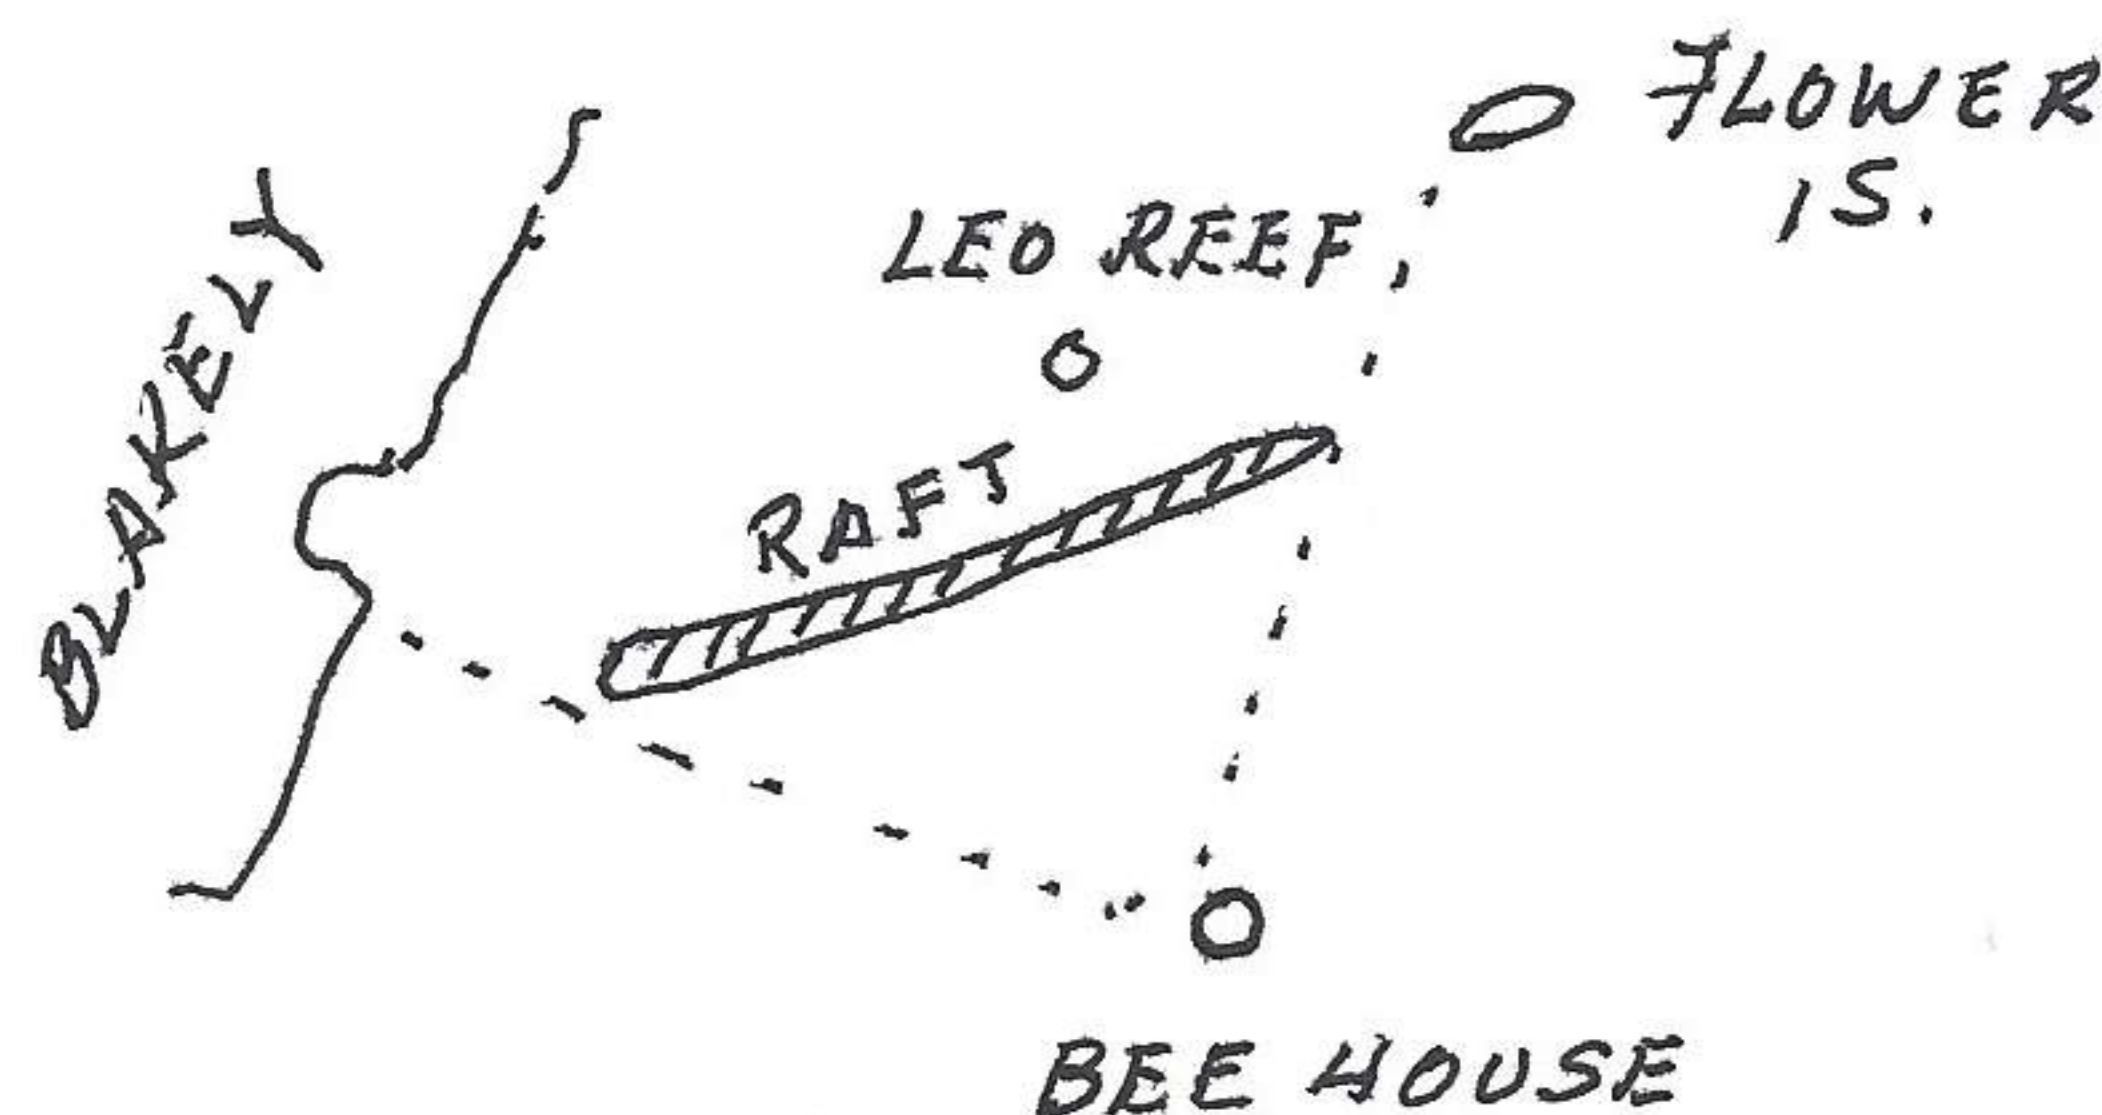

2 glaucous-winged gulls, 2 western

grebes, 1 rhinoceros auklet. The 35

double-crested cormorant that joined the raft left Leo Reef and flew S into wind leave water and then wheeled around and flew NW to raft alighting with the wind.

2 house sparrows at feeder Bee House. In the last week only 1 house finch came to feeder.

1:30 P.M. Harbor seal swarm NE past Bee House 50' from shore.

Nov. 17, 1986

Wind from SE, low clouds from S.

134 double-crested cormorant flew N between Leo Reef and Bee House in groups (single file) of 4-16. It took 5 minutes to pass. They flew just above water with wing tips from 3"-6" above water.

8:30 A.M. Approx 300 Arctic loon passed N as did the double-crested cormorant at least, as far as I could see, beyond Boundary Point. Flight lasted 8 minutes in loose groups. On the average the loon fly higher above water than cormorants. 12 glaucous-winged gulls followed.

8:35 A.M. Adult ♀ mule deer, fawn, young ♀ at feeder. The adult female & young ♀ left feeder and moved to Deer Trail Slope where they groomed each other. Fawn remained at feeder for 10 minutes. Adult ♀ = 29 1/2" high at shoulders.

12 dark-eyed juncos at feeder and numbers are increasing. The rufous-sided towhee and purple finch at feeder for first time this season.

8:55 A.M. 2 adult bald eagles on Leo Reef beacon platform, no other birds on Leo Reef. One eagle left 9:28 A.M. & flew to tree at Leichen Point. The other left 9:32 A.M., flew straight to Bee House, thence N along shoreline at 50' above water and 150' from shore. While eagles were on Leo Reef a double-crested cormorant approached Leo Reef, circled and then left. After eagles
