

at Swifts Lagoon; 4 gadwalls, 2 mallards. In Swifts Bay along shoreline are: 18 surf scoters, 13 buffleheads, 2 common goldeneyes and 6 glaucous-winged gulls.

Feb. 16, 1987

7:00 A.M. First bald eagle and glaucous-winged gull flew by Bee House. 15 more sightings (not different birds), between 7:00^{am} - 1200 P.M. most flying about 300' high.

Gulls (glaucous-winged) on Flower Island were displaced at least 6 times by bald eagles alighting on island. The gulls are not as aggressive as later during breeding & incubation and rearing of young stage.

From Bee House captured a white-footed mouse;
870216-1 *Peromyscus maniculatus holisteri*. 147-66-22-18-13gms ♂, testes 4 mm.

Feb. 17, 1987

Today is the date the Mary Pauline Bee had metacarpal surgery at Valley Hospital, S of Seattle. Returned to Chris at Lost Lake and in evening set 50 museum special traps on brink of valley slope among deciduous trees ^{oak + maple} with a few conifers including Douglas fir, hemlock, red cedar ~~AFR~~ Rain most of afternoon.

3/10 mi. E Lost Lake (E Lost Lake Road), Snohomish Co., Washington.

Feb. 18, 1987

From trapline set last night collected and prepared the following mammals:

870218-1	<i>Peromyscus maniculatus holisteri</i>	165-83-22-17-15gms	♂, testis 5 mm.
870218-2	" "	162-81-22-17-14gms	♂, testis 4 mm
870218-3	" "	179-91-22-18-16gms	♀, ut. normal.
870218-4	" "	164-82-21-17-14gms	♀ ut. normal.
870218-5	" "	164-82-21-17-12gms	♀, ut. normal
870218-6	" "	176-88-22-18-19gms	♂, testis 6 mm a tick on eyelid, gray, 3 mm length.
870218-7	" "	183-92-21-17-15gms	♀ ut. normal.
870218-8	" "	162-82-21-18-12gms	♀, ut normal
870218-9	" "	173-88-21-17-14gms	♂, testis 6 mm.
870218-10	" "	178-90-21.5-18-18gms	♂, testis 7 mm diameter tail 5 mm from base is 2.2 mm, skinned
870218-11	" "	166-89-21.5-18-12gms	♂, testis 4 mm.
