One otter directly below cliff and <sup>immediately</sup> not visible to us left and swam 150' under water at a depth of 8-10 feet toward main group ahead. The otter also have another call that sounds like a grunt made in clearing their nostrils(?) and is given without provocation by outside sources of intrusion. One frequently hears this grunt before seeing the otter.

Buster, a mule deer, at feeder.

The ♂ fawn of mamma deer is 27" high at shoulders. The female fawn of mamma deer was diseased, bloated stomach, emaciated and crippled in hind quarters has not been seen since last recorded in journal and is now presumed dead.
