

Nov. 16, 1989

7:45 A.M. adult bald eagle flew S past Bee House at 110' high and out 50' from shoreline.

at Swift Lagoon, 28 mallards.

at Bee House, mule deer eating yellow peach-leaved willow that were on the ground.

The rufous-sided towhee has been observed approx. once every 3 days for the last 2 months.

Townsend chipmunk still active.

5 eastern gray squirrels at feeder

8 mule deer in Bee House area and when a dark barked on road W Bee Estate 300 from deer, the deer all instantly left area at full speed. One stood on hill, a male, and last to leave. It slowly raised its left front foot and forcefully thrust its foot onto the ground. It performed this act 3 times and then as did the other deer, ran from the area.

Have not observed bats since new roof on house.

at Shoal Bay Marina, measured a Mopalia lignosa at 41 mm long and weighed 7 grams.

2 bald eagles flew S past Bee House at approx 50' high shortly after daybreak.

1:35 P.M., 2 adult bald eagles left Lechen Point and sailed in a low angle descent to NE Frost Island where a group of glaucous-winged gulls were concentrated on fishing. As the eagle were practically over the gulls they (the eagles) angles abruptly upward and circle, then flew to Leo Reef and alighted on the light beacon stand.

Nov. 22, 1989

12:45 P.M. In front of Bee House some 150' from shore 2 mew gulls started to dive for candlefish in an area of 4 sq. feet. In 12 seconds 5 glaucous-winged gulls arrived, then followed by 3 double-crested cormorants, the 2 Bonaparte gulls, then 4 pelagic cormorants. In four minutes the group consisted of 18 glaucous-winged gulls, 6 Bonaparte gulls, 12 mew gulls, 2 common murrelets, 4 western grebes, 2 red-throated loon and 5 horned grebes.

Nov. 24, 1989

11:35 A.M. Swift Bay: 130 bufflehead ducks, 18 surf scoters, 1 glaucous-winged gull, 30 common goldeneye. Overcast, cool and wind from SW.

Swift Lagoon: 29 mallards, 18 pintails, 15 northern shovellers, 6 American
