mule deer with right antler more curved than left (D) has winter pelage pattern there:

Aug 17, 1990

Last 3 weeks ocean spray reddish brown and more brilliant than I have seen on Lopez Island. It is the dominant reddish or any other color in the forests. Raccoon at feeder last night. Left Lopez Island for Anacortes at 6:49 A.M. 6 marbled murrelet. This ^{dark small} bird fly close to water, almost wing beat distance with fast wing beat. 1 pygmy guillemot, 19 rhinoceros auklets, dark like marbled murrelet but larger and wing beat not as fast as murrelet, body slope up from water and fly higher above water. Whirlpools of currents wind up bull kelp, 8 Bonaparte gulls and 4 mew gulls. Arrive Anacortes ferry terminal.

Aug 18, 1990
