

starling, red-tailed hawk, american robin, redwing, killdeer, slate-colored junco, ^{american} crow, mallard flew along at 55 MPH, small gull sp.?

Moravia, New York.

April 12, 1991

Photo of Cottonwood tree in Moravia at 2 blocks N of intersection of route 38 and Main Street.

Photos (Kodacolor)

910412-1 Annette + Cottonwood

910412-2 " "

910412-3 Cottonwood tree.

This tree was measured several years ago and will check to determine incremental growth. Checked and on July 24, 1972 this tree measured 25'9" at chest height, so in 20 years it grew 11" in circumference or approx 1/2" in circum. per year. On this basis if growth was constant the tree would be 110 years old.

In this same general area as above, a pileated woodpecker chipped a maple tree and produced chips measuring 6" x 2", 3" x 3 1/4", 2" x 3/4", 2" x 1" (some of the large pieces in approx. 60 chips on ground below the tree).

April 14, 1991

To Genoa to have dinner with Jim and Mary Malseed. Enroute observed 1 crow, 1 ring-necked pheasant, 10 gulls sp.?, 1 red-tailed hawk, 1 white-breasted nuthatch, 1 phoebe, 2 mourning doves. At Jim's place in Genoa observed a ruffed grouse that had flew into the window of their home, purple grackle, black-capped chickadee, 1 red-tailed hawk, 1 sparrow hawk (nest), american robin, phoebe nested 2 consecutive years above back door, titmouse, 2 woodrats had nests on his property, no beaver along creek, Indian site top hill to N E house, stripped skunk road kill. Jim's dog carried a dead rabbit wherever the dog went. This is the third day of this behaviorism.

Three photos:

910414-1 Jim & family

910414-2 Annette & Jim

910414-3 Jim's house.

Returned to Jim's home in Moravia.

Measured a sycamore tree along creek at 15'27" (or 17'3"?) E of town
