

collected by David Beck of Habibut Cove, mainly black arrow points, beads, figurines etc, and from below midden on beach after severe winter storms from n. There are four glass shelves in a glass cabinet and each shelf should be taken out and photographed.

The displaced mussel shells are nearly all contained on upper slope and only a few have moved down slope onto lower tide levels.

met Senator (former) Clem Tillion at his home on W end of causeway. We discussed the hazards of the poison hemlock which is in playing area of his grandchildren. He said that his house stands on an old midden site of early Indians. He offered excuses for disrupting his cove shoreline with bulldozer changing it from a natural condition to a disturbed (neater) cove. Enjoy his life in islands instead of living in Juneau.

Collected one plant from Ismailof Island, Habibut Cove, Kenai Peninsula Borough, Alaska.

no 920724-25

From cliffs on shoreline below Sitka spruce forests.

Left 7:34 P.M. for Homer Spit. Before boarding boat collected 3 molluscs from south side causeway between Ismailof Island.
