

Other birds and mammals observed on Steve Kaufman Estate are: violet-green swallow, tree swallow, cliff swallow, common raven, boreal chickadee, Steller's jay, golden-crowned Kinglet, white-crowned sparrow, song sparrow, golden-crowned sparrow, bald eagle, 5 sandhill cranes (S of property flying E.).

July 25, 1992

Steve Kaufman gave Annette and me a plane trip (his 180) along E side of Kachemak Bay from Halibut Cove to Tustumena Lake, flying into and out of 5 of the major glaciers (see map). Enroute observed 43 Dall sheep (some could have been mt. goats) and 3 moose. Did not see bears.

Trails led up slopes between glacier valleys in such a pattern as to suggest they were made and maintained by animals.

ROUTE IN STEVE'S CESSNA 180

Homer, Alaska

July 26, 1992

Left Steve and Mary's home for anchorage and flight to Lopez Island in Washington. Birds and mammals observed enroute; 7:45 A.M. left Steves; 8:01 Anchor Point; 8:22 A.M. Ninilchik River; 8:44 A.M. Kasilof River; 8:56 AM Soldatna; 9:10 A.M. left Soldatna; 9:15 american robin at Russian River?; 10:13 A.M. Turn Lake, 8 arctic terns; 10:29 A.M. red squirrel; 10:54 at same
