

Genus BOTANUS, Spach

Genus BOTANUS, Spach. The genus is named in honor of the late Dr. J. B. Spach, a distinguished French naturalist and botanist. It is a monotypic genus, containing only one species, *Botanus spachii*. The plant is a small, herbaceous perennial, growing in moist, shaded woods. The leaves are opposite, ovate, and have a serrated margin. The flowers are small, white, and arranged in a terminal raceme. The fruit is a small, round, capsule.
