

GOOSE PASTOR, JAMES

The Goose, the commonest of all the waterfowl, is found in all parts of the world. It is a very useful bird, and is much valued for its flesh and its eggs. The male is larger than the female, and has a long neck and a large bill. The female has a shorter neck and a smaller bill. The young of the Goose are called goslings, and are very common in the marshes and meadows.

BORN-COLOURED PASTOR

James, the Goose

the Goose

The Goose is a very useful bird, and is much valued for its flesh and its eggs. The male is larger than the female, and has a long neck and a large bill. The female has a shorter neck and a smaller bill. The young of the Goose are called goslings, and are very common in the marshes and meadows.
