

DOUBTTFUL SPARROW

Typical Sparrow

In the same family

It is not difficult to see that the species of many birds are not so distinct as they are often represented to be. In the case of the typical sparrow, for example, we find that the species of the typical sparrow is not so distinct as they are often represented to be. In the case of the typical sparrow, for example, we find that the species of the typical sparrow is not so distinct as they are often represented to be.

The typical sparrow is not so distinct as they are often represented to be. In the case of the typical sparrow, for example, we find that the species of the typical sparrow is not so distinct as they are often represented to be.

The typical sparrow is not so distinct as they are often represented to be. In the case of the typical sparrow, for example, we find that the species of the typical sparrow is not so distinct as they are often represented to be.

We have shown a male of the typical sparrow.
