SHARPE, (Richard Bowdler, British Museum)

A MONOGRAPH OF THE PARADISEIDAE, or BIRDS
OF PARADISE; and Ptilonorhynchidae, or
Bower-Birds.
With 80 magnificent handcoloured plates,
2 volumes, impl. folio, finely bound in
full red morocco extra, gilt edges,
with Arms on sides.

The most complete account of the BIRDS OF
PARADISE which has yet been compiled, as
it includes the results of all the recent
workers in New Guinea, where some most
splendid species lately discovered have
been figured in this work, including
Paradisornis Rudolphi, Astrarchia
Stephensiae, Paradisea Augustae Victoriae,
etc. Where practicable, the fine plates
of Gould's 'Birds of New Guinea' were
employed: but in many cases the species
were re-drawn by Mr. Hart, the artist who
helped Mr. Gould in the production of his
plates for more than forty years.
