

TRIGONOMETRIA

Trigonometriae

Trigonometriae

The outline of a second volume in trigonometry will be found with pleasure by every reader who is desirous of extending his knowledge in this branch of science. It is not only a highly useful branch of knowledge, but also a highly interesting one. The first volume of this work has been published in the year 1750, and has since that time been the property of every library. It is now published in a second volume, which will complete the work. The second volume will contain the same amount of matter as the first, but will be published in a more concise and elegant manner. It will also contain several new propositions, which will be found very useful in the practice of the art. The second volume will be published in the year 1755, and will be sold at the same price as the first, viz. 12s. 6d. per volume, bound in paper.

The price of the second volume
