

LYCOO

Lyceus albus, Bernst. Journ.
 et. ii. p. 192 (1866).—
 no. 4953 (1870).—Sharp
 vi. p. 199 (1880).—14.
 Soc. 1885, p. 373.

This species appears to be con-
 sidered as *Lyceus perisopterus* of Bate,
 distinguished from both by the
Lyceus. Count Salvendy
 distinct character of *L. mura-*
 stated five specimens of the pr-
 in the primaries. The exception
 was not had the primaries but
 Dr. Bernstein, the discoverer
 of *L. muraena*, it is a diffic-
 to Dr. Bernstein as "blank."
 The following description of
 it is taken from a specimen
 "General colour above and
 slightly washed with green on
 pen like the scapulars, the
 while the primaries much paler
 al 674, tarsus 1-9."

Dr. Guilleard says that the
