

ORIENTAL LINGUISTICS

Published by the

Cambridge University Press

There is a great deal of interest in the study of the languages of the East, and this interest is increasing rapidly. The study of the languages of the East is not only a branch of the history of the human mind, but it is also a branch of the history of the human race. The study of the languages of the East is a branch of the history of the human mind, and it is also a branch of the history of the human race. The study of the languages of the East is a branch of the history of the human mind, and it is also a branch of the history of the human race.
