

DISCUSSION

Introduction

It is the purpose of this paper to discuss the results of the experiments conducted in the laboratory of the U.S. Bureau of Standards.

1952

The first part of the paper is devoted to a description of the apparatus used in the experiments.

In the first part of the paper it is shown that the results of the experiments are in good agreement with the theoretical predictions. The second part of the paper is devoted to a discussion of the results of the experiments. It is shown that the results of the experiments are in good agreement with the theoretical predictions. The third part of the paper is devoted to a discussion of the results of the experiments. It is shown that the results of the experiments are in good agreement with the theoretical predictions.

It will be seen that the present work is in good agreement with the results of the previous work. The present work is in good agreement with the results of the previous work. The present work is in good agreement with the results of the previous work. The present work is in good agreement with the results of the previous work.

The results of the present work are in good agreement with the results of the previous work. The results of the present work are in good agreement with the results of the previous work. The results of the present work are in good agreement with the results of the previous work. The results of the present work are in good agreement with the results of the previous work.
