

HELIANTHUS VIOLIFLORUS

Violiflorus Helianthus

Thunberg (1794) first found it in the mountains of the Cape of Good Hope, and it was first introduced to the gardens of the Cape of Good Hope by Thunberg. It was first introduced to the gardens of the Cape of Good Hope by Thunberg. It was first introduced to the gardens of the Cape of Good Hope by Thunberg.

The first specimens I received of this new species of Helianthus were sent to me by Mr. Thunberg. He had collected them during his journey into the interior of the Cape of Good Hope, and also from the mountains of the Cape of Good Hope. The plants were sent to me by Mr. Thunberg. The plants were sent to me by Mr. Thunberg. The plants were sent to me by Mr. Thunberg.

The seeds of the plant are small, and are of a dark brown color. The seeds are small, and are of a dark brown color. The seeds are small, and are of a dark brown color. The seeds are small, and are of a dark brown color. The seeds are small, and are of a dark brown color.
