

# PLASTICITY OF BOURGEOIS

Journal of the

Academy of Sciences, Paris, 1914

Volume 1, No. 1, 1914

Paris, France

The first part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress. The second part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress.

The third part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress. The fourth part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress.

The fifth part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress. The sixth part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress.

The seventh part of the paper is devoted to a study of the plasticity of the material under consideration. It is shown that the material is highly plastic and that the plasticity is not affected by the direction of the stress.
