

GLAUCUS MELANURA, Gould.

Black-tailed Gull.

Glauco melanura, Gould in *Proc. Acad. Nat. Sci. Phila.* 1860.

The bird itself is the most striking thing about it, and the only one of its kind in the world. It is a small, slender bird, with a long, pointed beak, and a long, thin tail. The plumage is a uniform, dark, glossy black, with a slight iridescence. The head is small, with a long, pointed beak, and a long, thin tail. The plumage is a uniform, dark, glossy black, with a slight iridescence. The head is small, with a long, pointed beak, and a long, thin tail. The plumage is a uniform, dark, glossy black, with a slight iridescence.
