

LIST OF SPECIFIC NAMES

OF

HUMMING-BIRDS.

[The following is an alphabetical list of all the specific names of Humming-Birds with which I am acquainted and the species to which they have reference; both those appearing in my own work, and others which I have not been able to determine to what species they have been applied. Some of the latter have been assigned to manufactured specimens, and the descriptions of the others are frequently so curt and vague that they cannot be identified.]

Abeillei	Myiabeillia typica.
abnormis, Natt.	Not identified.
acuticaudus	Panychlora stenura.
Addæ	Spathura rufocaligata.
Adela	Oreotrochilus Adelæ.
Adèle	Pygmornis Adolphi.
Adolphi	Pygmornis Adolphi.
æneicauda	Metallura æneicauda.
æneicaudus	Aglaeactis Æquatorialis.
æneocauda	Campylopterus Æquatorialis.
Æquatorialis	Phaeolema Æquatorialis.
affinis	Thaumatias affinis.
affinis	Glaucis affinis.
affinis	Phaethornis superciliosa.
Aglaiae	Pyrrhophæma iodura.
albicollis	Leucochloris albicollis.
albigularis	— albicollis.
albirostris	Schistes albicularis.
albiventris	Thaumatias leucogaster.
albiventer	— albiventris.
albocoronata	Microchera albocoronata.
albus	Lampornis Mango.
Alexandri	Trochilus Alexandri.
Alice	Panychlora Aliceæ.
Alicieæ	
Alina	Eriocnemis Alinae.
Alinæ	
Aline	
Allardi	Metallura tyrianthina.
alticola	Amazilia alticola.
amabilis	Damophila amabilis.
Amaryllis	Lesbia Amaryllis.
amaura	Pygmornis amaura.
amazicula	Amazilia Dumerili.
Amazili	— pristina.
Amazilia	Pyrrhophæma Riefferi.
amazilicula	Amazilia pristina.
amethysticollis	— Dumerili.
amethystina	Heliangelus amethysticollis.
amethystinus	Calliphlox amethystina.
amethystoides	— amethystoides.
Anais	Petasophora Anais.
—	— cyanotis.
—	— iolata.
—	— thalassina.
Angela	Calliperidia Angelae.
Angelæ	Chlorostilbon angustipennis.
angustipennis	
Anna	Calypte Annæ.
Annae	
anthophila	Phaethornis anthophilus.
anthophilus	
antiqua	Erythronota antiqua.
Antoniæ	Threnetes Antoniæ.
apicalis	Phaethornis Guyi.
—	Thaumatias apicalis.
Aquila	Eutoxeres Aquila.
Arsennii	Helioptæda melanotis.
Arsinoë	Pyrrhophæna beryllina.
arsinoïdes	— Riefferi.
Aspasieæ	Pygmornis Aspasieæ.
assimilis	Chlorostilbon assimilis.
Atala	— Atala.
Atalae	— chrysogaster.
ater	— Atala.
atra	
atratus	Florisuga atra.
atricapillus	Lampornis Mango.
atrigaster	Eulampis holosericeus.
atrimonialis	Pygmornis Amaura.
Audebertii	Eucephala caerulea.
Audenetii	Polemistra chalybea.
Augusta	Phaethornis Augusti.
Auguste	
Augusti	
aurantias, Gmel.	Not determined.
aurata	Panychlora Aliceæ.
auratus	Eulampis jugularis.
—	Lophornis ornatus.
aureiventris	Chlorostilbon aureiventris.
Aureliae	Eriocnemis Aureliae.
aureoviridis	Lampornis viridis.
aurescens	Clytolaema ? aurescens.
aureus, Licht.	— rubinea ?.
auriceps	Chlorolampis auriceps.
auriculata	Heliothrix auriculata.
auriculatus	
aurigaster	Eulampis holosericeus.
—	Helianthea Bonapartei.
aurita	Heliothrix aurita.
—	— auriculata.
auritus	Eulampis jugularis.
—	Heliothrix aurita.
Aurora	Diphlogæna Aurora.
aurulentæ	Lampornis aurulentus.
aurulentus	Avocetta recurvirostris.
Azaræ, Vieill.	Not determined.
