Rollins. This is on hands a State organization at Fussen which kicks this to pieces something serious. How it will terminate I know not. It is the design to apply for admission into the Union this winter & it is presumed will be successful. In the meantime we design to get up a State organization and pass laws for our own government keeping up our State government until we are admitted. This is an unpleasant crisis in our affairs at present. How it will go we know not. The laws and acts of the people of the Territory will be in direct antagonism to the laws of the late pseudo Legislature. Governor Stanton & all the Territorial Officials will be ranged on the one side & the people on the other. This comes the lay of war. By this course we place Congress & the Administration in a position in which they must define their position in regard to them & us. Mr Elliott has run sick for we are sorry to say will be unable to walk. We have had no division of lots yet. He proposes giving me one half of the lots & paying me all the money that I have put in. But I do not like to leave it until Kansas is a free State. He is unwilling to allow me any more than one half of the lots. I must take steps for what money I have & if possible get more than half back. But I presume we will lose a good deal
