LETTER XXII.—The March of Empire	84

THE MAP.

THIS is probably the most accurate and reliable Railroad Map that has ever been offered to the public. It is a fac-simile of the official map prepared from the most recent surveys and explorations under the authority of the Government at Washington, and was drawn and engraved by W. J. KEELER, Esq., of the Indian Bureau, expressly for this work. The lines of both the great Pacific Railroads are laid down as nearly as possible as they are to be, and with equal fairness and fidelity. It was not deemed to be either honest or politic to insult the intelligence of the country by stretching a favorite line, like a ribbon, across the continent, and attempting to ignore, as far as possible, all other roads that are not subsidiary to it. All that is essential to a full and fair understanding of the great question of routes from the Missouri to the Pacific is given.
