CORN-HUSKING BEE

IS FARM SYMBOL

Today, a contestant brings along an investment running from \$3,000 to \$12,000, not to mention a \$5,000 or \$6,000 tractor to pull his mechanical corn husker. Thirty years ago, all he needed was a 10-cent pair of gloves and a 25-cent hook to pull ears of corn off the stalks and filing them against a bang

Special to The New York Times

SIOU+ FALLS, S. D., Oct.

17—A corn-husking bee proved again this week to be one of the most attractive farm events in the Midwest.

drawn wagon.

The contest itself is no longer a recognized sporting event.

Now, it is a test of skill with a machine, involving careful machine settings to get maximum yield.

If nothing else, the contests

Of course, it had some power- reflect the vast changes in ag-

Presidential and a Vice-Presidential candidate and row after row of the latest models of farm equipment, capable of almost everything from picking corn to pouring drinks.

However, like the New York Yankees, the sporting event doesn't draw as well as it did 30 years ago when the first husking bee was held. Like so many agricultural fairs, its future is in doubt as farmers roar to cities over four-lane highways and leisure time in the interior of through technology, science and farm management since World War II.

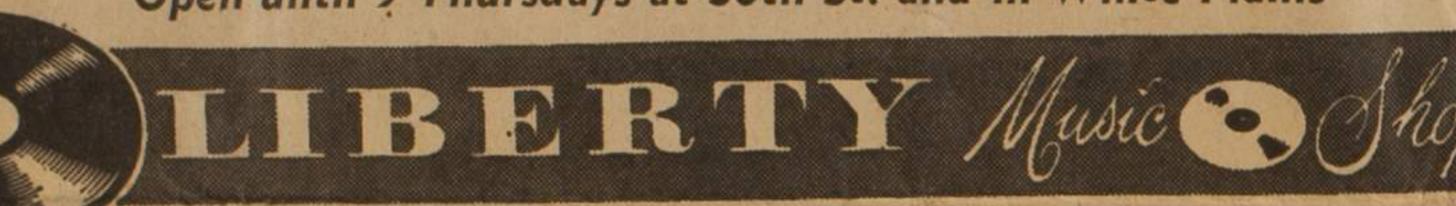

One contestant was reminiscing yesterday about the contrast between hand-picking and mechanical picking.

"I though I was some punkins," he said, "when I got up to 100 bushels a day by hand. Now, I don't feel I'm doing well unless I harvest between 1200 and 1400 bushels a day."

"The first corn-picking chambins, and Iowan," a bystander pion, an Iowan, an Iow

rom a sporting event that drew 125,000 persons in 1938, the national corn-picking contest has become big business, with planning going on a year ahead of time, budgets running to between \$45,000 and \$50,000, giant machinery displays, political campaigns and personal dropped out four years ago be-

Scientist Calls for a New Study of Negro-White 'Differences'

By JOHN A. OSMUNDSEN
A University of Chicago physiological and sociological problems."

The Chicago physiologist began his examination of the evidence on both sides of this issue with an assessment of that there was only "faulty evidence" to support the "plausible hypothesis" that the white and Negro races were approximately equally endowed with intelligence. There were the supported the view that learning ability is to some extent under genetic control and that general and coached did improve in their performance to equal or exceed norms for whites, Dr. Ingle wrote. But measures of training effects on improvement in white children have not been made he said. "It is not known whether optimal support of support of genetic endowment of both races would decrease, abolish, or increase the differences between races," the scientist wrote.

QAnimal experiments have supported the view that learning ability is to some extent under genetic control and that were found in comparisons of whites, Dr. Then, he said, any differences in test performance should be measured for statistical significant of the test support of statistical significant of the test support of second norms for whites, Dr. Then, he said, any differences in test performance should be measured for statistical significance and the tests performance should be measured for statistical significance and the tests performance should be measured for statistical significance and the tests performance to equal valuation of differences in drives and data on the highest achievers of differences in test performance should be measured for statistical significance and the tests performance should be measured for statistical significance and the tests performance to equal valuation of differences in test performance to equal valuation of differences in test performance should be measured for statistical significance and the tests performance should be measured for statistical significance and the tests performance to equal valuation of differences in test performance sho

ly equally endowed with intelligence and drives.

At the same time, he asserted, "the concept that the average Negro is significantly less intelligent than the average white is also a plausible hypothesis for which there is faulty evidence."

At the same time, he asserted, "the concept that the average Negro is significantly less intelligent than the average white is also a plausible hypothesis for which there is faulty evidence."

At the same time, he asserted, "the concept that the average white is also a plausible hypothesis for which there is faulty evidence."

At the same time, he asserted, "the concept that the average white is also a plausible hypothesis for which there is faulty evidence."

At the same time, he asserted in traits may be also.

GTHe same has been shown in studies on humans, particularly those involving identical twins.

GHISTORY AND Significant differences available that could indicate whether racial differences in intelligence test results and school achievement of white children and Negroes who were matched for socio-economic background. Dr. Ingle said, however, that intelligence, culture and socio-economic standing twins.

GHISTORY AND SIGNIFICANT AND S

argument between equalitarians and their antagonists, the scientist concluded that "there is no sound structure of evidence and logic which compels a conclusion on the issue of race and intelligence."

The scientist is Dr. Dwight J. Ingle, a professor of physical characteristics who have attended integrated schools from the brain.

Geven Negroes who have attended integrated schools from the brain.

Conceal any average racial differences among matched groups. Gerences among matched groups. Ge

ell in school and intelligence and Southern whites and Southern Negroes and Southern Negroes before concluding that the differences observed in the World War I study were caused by environmental factors only.

Trd, Dr. Ingle as
Trd, Dr. Ingle as-

Some studies have shown that "the culture of the and street probably requested in the children. To what extent the equalitarians argued cultural deprivation, lower standards and increasted interest and congressional District of Indiana in the House next term.

Whether he will be a conservative Republican or a liberal Democrat probably depends on whether President Johnson or Senator Goldwater carries failed to capture the organ of the New York Times INDIANAPOLIS, Oct. 17—An aggressive young lawyer who overcame the opposition of his elders to win the nomination will represent the 11th Congressional District of Indiana in the House next term.

Whether he will be a conservative Republican or a liberal probably depends on whether President Johnson or Senator Goldwater carries failed to capture the organ of the North Times INDIANAPOLIS, Oct. 17—An aggressive young lawyer who overcame the opposition of its adherents and choice for the North Times INDIANAPOLIS.

branch of Americans for Con-

servative Action.

Arguments Sketched

First, Dr. Ingle wrote that the races are equally endowed in the races are equally endowed in jobs and government at all as they grew older was an infologial.

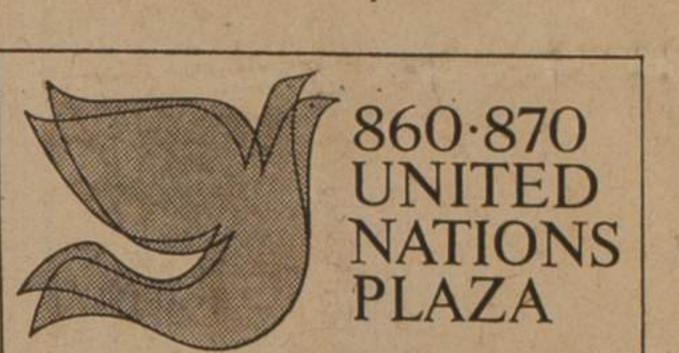

"If [that view] is not correct," he continued, "then equal representation of the Negro at the higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence and in government with higher levels of job competence in the maturative explanation of the Marion determining whether differences the intelligence and intelligence that determining whether differences differences in the maturative of whites and Negros would be extremely difficult, but he outlined what the considered an approach to the problem.

First, he wrote, true word in the tendency that he said the tendency that he said determining whether differences existed in the intelligence, ability and drive of whites and Negros would be extremely difficult, but he outlined what he considered an approach to the problem.
