Dear Genie

I hope this finds you and the family OK. We are doing fine. Had quite a bit of snow but the ground is clean now. You know the south west wind melts the snow off in a hurry when we have one which we do often. That makes it good for the cattle men. ~~The~~ The snow was beautiful on the mountain this morning, a lot of it up there reaching down to the foot hills. Snow up there has driven the deer and the antelope down and several of them have been out here grazing on our stacks and we need our hays to. No we do not shoot them. The season is past and a fine would attache so they are roaming here
