

K.C., Mo. June 23, 1935

Dear Rose -

I know you would like to come down but this is the same old dry Kansas City and mamey is so scarce I believe you had better stay on your job until I can go home. For Marie & Warren will stay there until I get home unless your paper completely runs them off.

They drew nearly a pint of blood from me yesterday and transfused it to Neta and she seems a whole lot better today, she is stronger and looks better in the face, her color and all. The dr. said she would have two more transfusions then she will be ready for the operation, he said it would be a minor operation. Neta has a good appetite too! The blood from all three of us tested out all right.

Some of good cheer, maybe times will be better after a while, I hope so any way. Mrs. Whit has been down to see me, but I haven't seen anything of Ruth, Dorothy nor Ollie. Edna goes to see
