*America's Largest and Most Successful Teachers of Invisible Mending*

Dear Friend:

Do you need extra money? And I don't mean \$5.00 or \$10.00 a week. Would you be interested in earning up to \$50.00 in a week for part-time work done at home? Some folks who devote full time to the work, report even greater earnings are possible working right in their own homes.

If you sincerely want to earn extra money at home, you'll be interested in the wonderful opportunity offered by the Fabricon method of Invisible mending. Fabricon Mending is quiet, dignified work. It requires no door bell ringing or hard sales effort. Experienced Fabricon menders report that customers seek them out and then business and profits come almost automatically.

*Fabricon mending is the rare, little-known art of invisibly mending holes, cuts, tears and rips in clothing and fabrics. With Fabricon overlay mending method a torn garment is actually mended so the damage cannot be seen. Fabricon mending is truly invisible — not sewing or darning.*

The demand for invisible mending service is big and growing bigger. Laundries, cleaners, clothing stores, department stores and countless individuals need and want invisible mending service. In many towns there isn't even one person qualified to do this work, so garments requiring invisible mending are sent to big cities. Big city service is often slow. Big city prices are high. A local invisible mender - offering faster, better and more economical service - should have little or no trouble getting virtually all the business in town. This isn't just an optimistic statement. It has happened for dozens and dozens of Fabricon invisible menders.

Yes, there most likely is an exceptional opportunity waiting for the right person in your community. The Fabricon invisible mender in your town can look forward to building a steady business, a business that others have found will pay off in profit for full time or spare time work at home.

*Specifically, what earnings can be expected with invisible mending? This is a most important question and I want to answer it truthfully and sincerely. Some Fabricon invisible menders have earned over \$100.00 in one week working at home. Other exceptional Fabricon invisible menders have earned up to \$11.50 for one hour of work. Let me just say that the normal charge for invisible mending a small hole (usually about twenty or thirty minutes work) is from \$2.00 to \$3.50. Larger damages can bring \$10.00 or more. One Fabricon invisible mender got over \$20.00 for her work on one moth damaged coat. Yes, chances for earning with Fabricon invisible mending are promising indeed.*

Can you do the work? This is another important question. The answer is that Fabricon invisible mending is easy to learn if you have normal use of hands, good eye-sight with or without glasses, want to learn, and can understand plain ordinary simple English. You need no special qualifications, education or previous experience. Age makes little difference. Fabricon invisible mending is being done by average people - men and women - who knew nothing about the work until they took our course.

I have told you just a little about Fabricon invisible mending in this letter. The complete exciting story is available FREE and without obligation to you. Just write and ask for it. I'll tell you what other folks have accomplished with Fabricon invisible mending. I'll tell you and show you how to get started - how to earn while you learn.
