

November 19, 1937.

Mr. A. Eugene Haylett,  
Department of Athletics,  
Doane College,  
Crete, Nebraska.

Dear Gene:

I, of course, am sorry that you will not be at the Kansas City meeting. We will miss you.

I hope to get down to Manhattan to see your ball game if I get away from the meeting in time.

We are using the Lowe and Campbell No. B220 official basketball. Personally, I do not like the new ball, as the ball thrown at a distance does floaters, sinkers, and other didoes. I am not expecting to use it in any of our games this year.

I have a letter from H. V. Porter, secretary of the National Basketball Committee of the United States and Canada. He tells me that the Cord-Bilt ball, another type of ball, is much superior to the Lastbilt. There are a lot of things wrong with the molded ball at the present time, in my opinion.

I think that should be open for discussion during our rules meeting in Kansas City. In fact, I think I will make that one of the items for discussion after the rules meeting is over.

Very cordially yours,

FCA:AH

Director of Physical Education.
