

October 5, 1943

Physical Education Instructors:

Just to keep you abreast of the discussional stage of the possible opening of the swimming pool, I am quoting Dr. Canuteson's letter of Oct. 1:

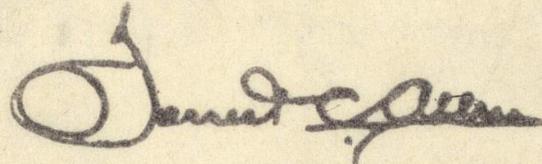

"After conference with Dr. C. H. Kinnaman, State Board of Health, and Lt. Comdr. Webb B. Key it appears safer to keep the swimming pool closed at least until October 11. Developments during the next ten days will determine the advisability of further delay.

Poliomyelitis cases in Kansas for the past five weeks were as follows:

Week ending August 28	65
September 4	90
September 11	47
September 18	76
September 25	56

Since September 25, 34 cases have been reported to date."

Sincerely yours,

Director of Physical Education
