

September 27, 1939.

Mr. C. G. Bayles,  
Superintendent,  
Buildings and Grounds.

Dear Mr. Bayles:

I presume that the Gas Company will tamp the ground down well after they have finished laying the pipeline across the intramural field. I am assuming that you will see that the Gas Company has the responsibility of putting the field in playing condition. After the rains come doubtless the ground will sink a little where the ditch has been dug.

Sincerely yours,

Director of Physical Education and Recreation,  
Varsity Basketball Coach.
