

THE UNIVERSITY OF KANSAS
LAWRENCE

DEPARTMENT OF BUILDINGS AND GROUNDS
C. G. BAYLES, SUPERINTENDENT

October 22, 1938

Dr. F. C. Allen, Director
Physical Education Dept.
University of Kansas

Dear Dr. Allen:

I want to express my appreciation for the very valuable service to this Department given by Instructor, Herbert G. Allphin.

Our electricians have completed several periods of instruction on first aid and prone pressure methods for their own protection in their work. This has been under Mr. Allphin and is much appreciated by the workers themselves as well as the writer, who is more or less directly responsible for their protection and the safety of their working conditions.

As you know all or most of the higher voltage equipment of the University is in underground vaults and ducts. This makes accidental contacts doubly hazardous on account of moisture and grounds where they must work.

We have recently purchased tools for testing this equipment before men attempt to work with it and I feel sure that this equipment backed up by some training in what to do in case of accidents, will aid greatly in the protection of our employees.

We appreciate your cooperation on these instructions and thank you.

Cordially yours,

C. G. Bayles
Superintendent
Dept. Buildings & Grounds

CGB:hi
c/c Mr. Herbert Allphin
