8/1/44

Dr. Allen;

Intramurals fund had a balance of \$926.08 carried over from last year.

It seems that the anticipated cost of the tennis courts was \$4,000.-. Therefore, from appropriation and by transfer \$3,073.92 was set up in University accounts to supplement the 926.08. The construction cost, as you know, was \$3,756.⁰⁰. To pay this the entire \$3,073.92 is being used, along with \$682.08 of the original amount in Intramurals Fund.

This leaves a balance in the account of \$244.⁰⁰, which I understand is earmarked for backstops, et cetera.

Now for this year. As Nichols set up the activity fee the Intramurals fund participates only in the receipts from the 6 and 8 weeks summer Terms. Enrollment in these Terms is small and your income will approximate \$105.⁰⁰

Thank

Chas. L. Brown
