AST Department Heads:

Possible enrollment for next term in A.S.T.P.:

No. of Reserves enrolled now, Term I	18
No. of Reserves enrolled now, Term II	152
No. in Term I who will be 18 after Dec. 30	3
No. in Term II who will be 18 after Dec. 30	24
Total number enrolled now in Term II	355 (appr.)
No. of Term II Reserves leaving at the end of the term	134
No. of present enrollments eligible for Term III	221
Total number enrolled now in Term I	350 (appr.)
No. of Reserves leaving	15
No. of boys eligible for Term II next term	335
Total (Soldiers and Reserves) for next term:	
Potential Term III	221
Potential Term II	335
Potential enrollment next term from present enrollment.	556

This would require 150 new boys, of whom 50 will probably be reserves, and we do not know which term the new boys will be assigned.

These numbers of potential enrollment for Terms II and III next term do not provide for failures and withdrawals this term. It is estimated that 15% to 20% of the present Term I boys will fail and 10% to 15% of Term II boys will fail this term.

Sincerely yours,

Bert A. Nash  
Director, AST Program
