

January 26, 1938.

Mr. R. E. Korte,
The Bask-O-Lite Company,
New Albany, Indiana.

Dear Mr. Korte:

We have received the two switches, and also the new type basket. We wired for the new basket because the one we had was equipped with the old time switch which would get out of order quite frequently, and we felt we could ill afford to have something here go bad since we are championing the Bask-O-Lite goal.

I am enclosing copies of letters received from Coach George Edwards, of Missouri, and Coach Browne, of Nebraska. They are putting a light up there and flashing it from the desk, but the light is not attached to the basket, it is attached above the backboard.

We played Missouri when they used such an arrangement. I have wired Louis Menze that we are holding to the Bask-O-Lite goal. There seems to be a prejudice among some of these fellows because they lost their first games with the goal. We lost our first game with these goals, but we are not blaming the goal. We think there is something very definitely worth while in them.

This information that I am sending you is strictly confidential, but I thought you should be notified in case you might have a suit for infringement of patent.

Sincerely yours,

Director of Physical Education,
Varsity Basketball Coach.
