

BASKETBALL'S GREATEST INNOVATION . . .

"In Goes the Ball—
On Goes the Light"

Dr. Allen

I am particularly anxious to have some tests made on whether our Bask-O-Lite is harder to make goals than the conventional type. I think the fairest test on this is games played with one regular goal on one end and our Bask-O-Lite at the other end and the count kept on ten games. If it is possible for you to do this I would appreciate it.

I had thought I would be out to see you by this time but I seem to have more things than I can get done but I do hope to pay you a visit some time before the first of the year.

Thanking you for all of the nice things you have done and hoping to see you soon, I remain

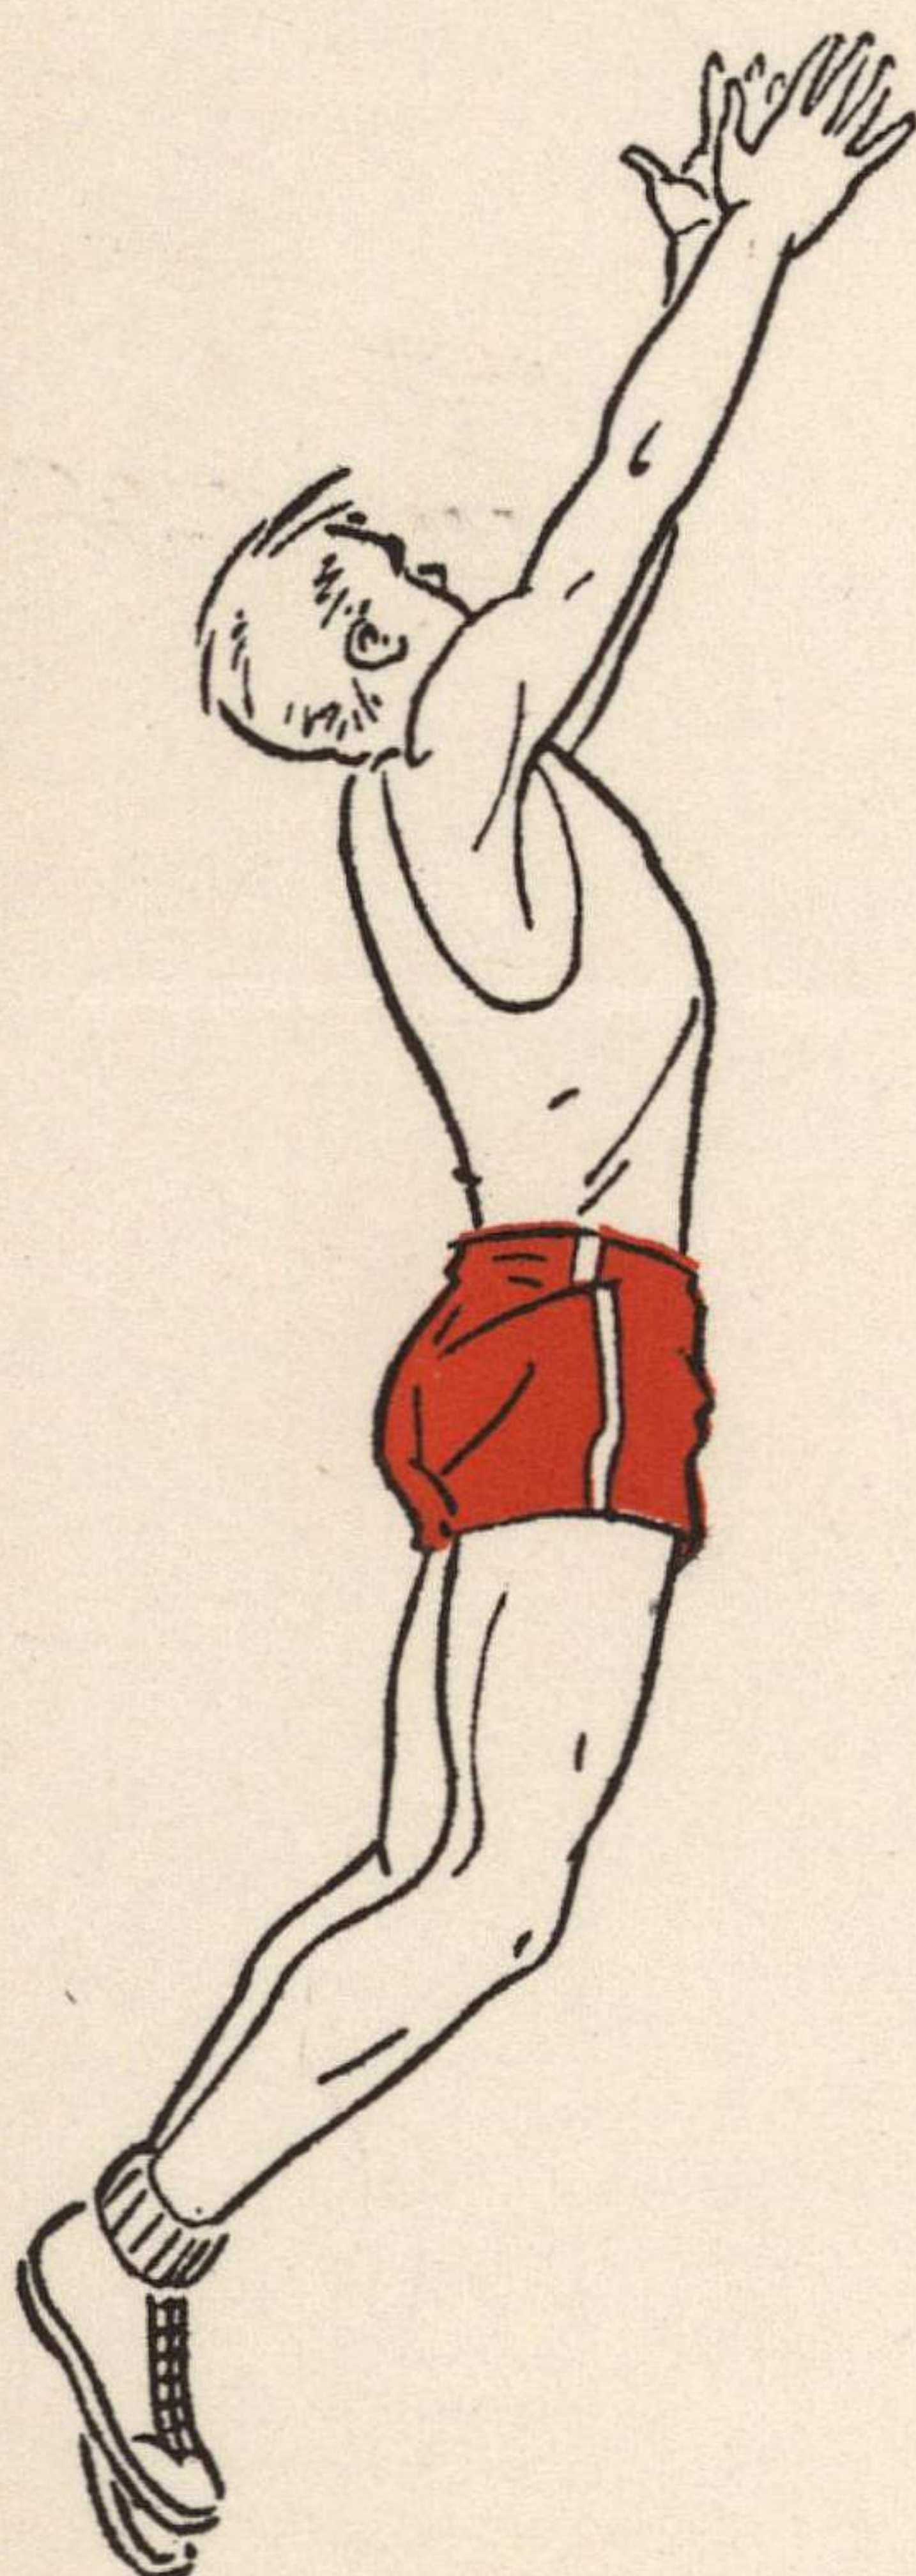

Yours very truly,

THE BASK-O-LITE CO.

P. E. Korte

REK/c

P. S. Since writing the above have received a letter from Geo. Edwards, copy of which we are enclosing. We would be pleased if you will hand same to our Mr. Cory when he calls on you.
