Dr. Allen
Lawrence Kans.

Dear Mr Allen:

I am writing you in regard to the Navy,
Army V-12 program.

My boy passed his intelligence test for
the Army aviation but in his medical he proved to
be color blind. He plans to take this test ^{in March}
15th and he must state his preference before he takes
the test, I am wondering if you might know
which he would be most likely to get into
being color blind.

John will be 18 May 25th a week after he
graduates. He has a high I.Q. has an average of A-
in grades. Has averaged 15 points per game for 22 games
and played Quarter in foot ball.

If possible I would like for him to get in one
of these branches and if possible get his training
under you in basket ball.

If you could give me any information as to some
branch he could get into being color blind please let
me know at once!

a true friend
