**J.E. PORTER CORP. OTTAWA
ILLINOIS**

THE "FIGUREGRAM" Scoreboard can be installed against the wall, out from the wall on brackets, or from overhead. Two faces can be applied to the board, with one mechanism operating two clocks, two horns, two sets of score figures, and two sets of quarter lights. Two separate boards can be operated from a single control panel in perfect synchronization. Clocks can be supplied for 8 minute quarters, 10 minute quarters, or 20 minute halves.

The PORTER "Figuregram" Scoreboard can be furnished with or without "time out" clock. This clock works in synchronization with the scoreboard spectator clock and is built into the control box as illustrated elsewhere. Clock and red signal light are housed under a dust proof unbreakable transparent cover. Write for full information regarding this amazing scoreboard!
